

Docker compose with .env file in the same directory:

```
version: '3'
services:
  postgres:
    image: postgres:latest
    environment:
      POSTGRES_DB: ${DB_NAME}
      POSTGRES_USER: ${DB_USERNAME}
      POSTGRES_PASSWORD: ${DB_PASSWORD}
    ports:
      - "5433:5432"
    volumes:
      - pgdata:/var/lib/postgresql/data
volumes:
  pgdata:
```

I'm using port 5433 as 5432 is already used by current postgres on my laptop

Commands:

```
docker-compose up -d
```

Check that the container is up and running:

```
docker-compose ps
```

NAME	IMAGE	COMMAND	SERVICE	CREATED	STATUS	PORTS
pg_docker-postgres-1	postgres:latest	"docker-entrypoint.s..."	postgres	About a minute ago	Up	About a minute 0.0.0.0:5433->5432/tcp
